

# NEXT ENGINEERS

## Building a world that works

Engineers build worlds. All kinds of worlds.

Engineers build jet engines that ensure safe and sustainable travel, design portable medical equipment to reach more patients around the world, and create wind turbines that generate cleaner energy.

And we need a more diverse engineering profession to bring new perspectives, experiences, insights, solutions, and greater innovation to today's challenges. And tomorrow's.

This work begins in Cincinnati, Ohio.

GE has been a part of the Cincinnati community for over 70 years, creating opportunities for all. *Next Engineers* brings new, inspiring programs to engage diverse students ages 13-18 to spark their interest in becoming engineers and ensuring Cincinnati is at the forefront of technology for decades to come.

Let's build the world we want, together. Learn more at [www.NextEngineers.org](http://www.NextEngineers.org).

**IMPACT IN  
CINCINNATI**

**\$5M**  
community  
investment

**3,500**  
students  
reached

**36,000** Engineering and College  
Readiness Educational Hours

**Thousands** of GE Volunteer hours

## Building the Future

Youth tinker, explore, and imagine. By introducing them to engineering concepts and career opportunities, *Next Engineers* will unlock their potential as the next generation of problem solvers.

Around the world,  
*Next Engineers* seeks to  
engage 85,000 youth in the  
next 10 years, which will:

- ✓ **Address Global Challenges.** Engineers are creating blueprints for a world that works and engineers from diverse backgrounds can bring the varied perspectives we need to address the world's most pressing challenges – from sustainable flight to quality healthcare and clean energy.
- ✓ **Light Pathways.** Anyone who wants to be an engineer and shows aptitude for engineering should be able to become an engineer. *Next Engineers* provides opportunities and support for all participants.
- ✓ **Change the Narrative About Engineering.** Many youth have preconceived notions about who can become an engineer, or what engineers do. By introducing students to engineering role models from diverse backgrounds, we are inspiring more students to pursue engineering careers and building a more diverse engineering workforce.

# Engaging the Next Generation

Through three core programs, *Next Engineers* guides students along the path to engineering careers.

Students' participation will be supported and monitored by professionals, using a balance of technology-enabled and hands-on learning resources.

Students completing the Engineering Academy and who are accepted to a post-secondary education engineering degree program will be awarded a **\$20,000 scholarship**.

## NEXT ENGINEERS PROGRAMS

### Engineering Discovery (Ages 13-14)

Youth build awareness about what engineers do through a variety of short, exploratory sessions. Volunteers deliver creative, hands-on activities in the classroom or community to inspire youth and expand their understanding of what engineering is all about.

### Engineering Camp (Ages 14-15)

Students are immersed in the engineering process through a week-long camp experience. Students interact with experienced engineering faculty, staff, and business leaders as they complete design challenges inspired by real-world scenarios, building an identity as aspiring engineers.

### Engineering Academy (Ages 15-18)

Over three years, future engineers learn to think and act like engineers and prepare to advance to post-secondary education through the Academy. With over 80 hours per year outside of school, the Academy includes a series of immersive design challenges, career coaching, and college-readiness workshops to equip diverse groups of youth with the skills they need to build an engineering identity and career.

- Engineering Design Thinking
- Creativity
- Problem-solving
- Teamwork and Collaboration
- Making and Building
- Communication

## Thinking Globally, Working Locally

Cincinnati is one of four inaugural locations for *Next Engineers*. With full funding from the GE Foundation and technical support from FHI 360, the University of Cincinnati (UC) will coordinate and deliver the program in Cincinnati.

UC brings to the table excellence in education, high-quality programming that empowers underrepresented young people to pursue engineering, and enduring secondary school partnerships. Local GE employees will volunteer engineering expertise, career exposure, and structured learning activities. Together, we are investing in Greater Cincinnati's youth.

**Join the GE Foundation in our mission to inspire the next generation of engineers: youth from around the world who will be the innovators, problem-solvers, and leaders of tomorrow.**
