

# NEXT ENGINEERS

## Building a world that works

Engineers build worlds. All kinds of worlds.

Engineers build jet engines that ensure safe and sustainable travel, design portable medical equipment to reach more patients around the world, and create wind turbines that generate cleaner energy.

And we need a more diverse engineering profession to bring new perspectives, experiences, insights, solutions, and greater innovation to address our world's challenges.

This work begins in Staffordshire, U.K.

GE has been a part of the Staffordshire community for over 60 years, creating opportunities for all. *Next Engineers* brings new, inspiring programmes to engage diverse students, aged 13-18, in four cities to build worlds that haven't even been thought of yet. As one of four global locations, *Next Engineers* ensures Staffordshire will be at the forefront of technology for decades to come.

Let's build the world we want, together. Learn more at [www.NextEngineers.org](http://www.NextEngineers.org).

### IMPACT IN STAFFORDSHIRE

**\$3.5M USD**  
community investment

**3,500 students**  
reached

**36,000** Engineering and College Readiness Educational Hours

**Thousands** of GE Volunteer hours

## Building the Future

Young people play, explore, create, and imagine. By introducing them early to engineering concepts and career opportunities, *Next Engineers* will unlock their potential as the next generation of problem solvers.

Around the world, *Next Engineers* seeks to engage 14,000 youth by the end of 2026, which will:

- ✓ **Address Global Challenges.** Engineers are creating blueprints for a world that works, and engineers from diverse backgrounds bring the variety of perspectives and ideas we need to address the world's most pressing challenges – from sustainable flight to quality healthcare and clean energy.
- ✓ **Light Pathways.** Anyone who wants to be an engineer and shows aptitude for engineering should be able to become an engineer. *Next Engineers* provides opportunities and support for all participants.
- ✓ **Change the Narrative About Engineering.** Many young people have preconceived notions about who can become an engineer, or what engineers do. By introducing students to engineering role models from diverse backgrounds, we are inspiring more students to pursue engineering careers and building a more diverse engineering workforce.

# Engaging the Next Generation

Through three age-dependent core programmes, *Next Engineers* guides students along the path to engineering careers.

Students' participation will be supported and monitored by professionals, using a balance of technology-enabled and hands-on learning resources.

Students completing our Engineering Academy programme, and who are accepted into higher education for engineering degrees or engineering apprenticeship opportunities, will be awarded **\$10,000 USD in financial support.**

## NEXT ENGINEERS PROGRAMMES

### Engineering Discovery (Ages 13-14)

Young people build awareness around what engineers do through a variety of short, exploratory sessions. Volunteers deliver creative, hands-on activities in the classroom or community to inspire young people and expand their understanding of what engineering is all about.

### Engineering Camp (Ages 14-15)

Students are immersed in the engineering process through a week-long camp experience during school holidays. Students interact with experienced engineering faculty, staff, and business leaders as they complete design challenges solving real-world problems, building an identity as aspiring engineers.

### Engineering Academy (Ages 15-18)

Over three years, future engineers learn to think and act like engineers and prepare to advance into further education through the Academy. With over 80 hours per year outside of school, the Academy includes a series of immersive design challenges, career coaching, and college-readiness workshops to equip diverse groups of students with the skills they need to build an engineering identity and career.

- Engineering Design Thinking
- Creativity
- Problem-solving
- Teamwork and Collaboration
- Making and Building
- Communication

## Thinking Globally, Working Locally

Staffordshire is one of four global locations for *Next Engineers*. With full funding from the GE Foundation and technical support from FHI 360, Connectr will coordinate and deliver the local programme.

Connectr is an award-winning social business with extensive understanding and experience in delivering curriculum-aligned engagement programmes in schools, colleges and universities across the U.K. The local GE business, GE Grid Solutions, will provide engineering expertise, career exposure, and structured learning activities. Together, we are investing in Staffordshire's young people for the future of our world.

**Join the GE Foundation in our mission to inspire the next generation of engineers: students from around the world who will be the innovators, problem-solvers, and leaders of tomorrow.**
