Engagement Toolbox

Tips and strategies to increase student participation.

Cooperative Learning Roles from Edutopia

See how randomly assigning roles can ensure that every student is actively involved in group work. Consider using this technique for hands-on Discovery activities and Academy Design Challenges.

The Latest Read

Articles and blogs illuminating topics in engineering, STEM, and education.

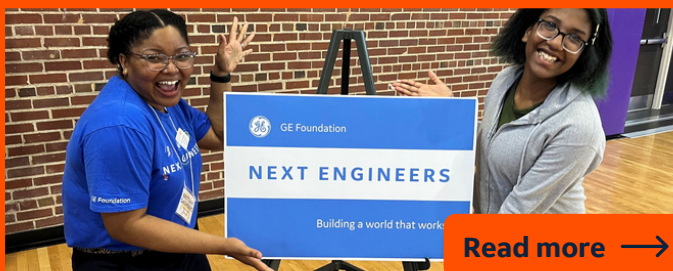

Logitech and Girls Who Code Research Asks: “What (and Who) is Holding Women Back in Tech?”

A new report found five key factors that propel women forward or hold them back from pursuing engineering and tech fields:

1. Early cheerleaders and role models matter
2. Passion is a key driver
3. Meaningful jobs that contribute to society
4. Women-friendly communities help persistence
5. Meaningful action from men makes a difference
